Cauca leads climate smartness for agriculture in Colombia reaching 150,000 farmers

THEMES

Climate-smart technologies and practices

GEOGRAPHIC FOCUS

Latin America

In 2017, CCAFS, Ecohabitats Foundation and rural communities collaborated to promote the Climate-Smart Villages (CSVs) in Cauca, Colombia. This led to an **investment of USD 66 million** from the Royalties National Fund **to scale climate-smart agriculture (CSA) in at least 8 municipalities.**

CSA practices have **potentially reached over 150,000 farmers** to date, and the CSV in Cauca is now widely known in other countries through South-South exchanges that have been carried out. Cauca's Environmental Authority is slated to receive USD 66 million to further scale out CSA in the region.
